

lowcrop.aero intro

The main page

Here you can register a new competition, view news items, or read the frequently asked questions. There is also a list of competitions that are in progress - this provides a link to those associated with the competition to manage outlandings, in case they have forgotten the competition tag. The competition tag works as a short URL, with the competition page being located at [lowcrop.aero/CompetitionTag](#).

Basic setup

This page can be accessed once you have registered a competition on the main page. From the basic setup page you may enter details like the competition name, location, dates, and latitude/longitude of the airfield. You may also choose if you want the competition displayed on the main page of the website

The screenshot shows the 'Basic setup' page for editing competition data. At the top left is the same logo as the main page. To the right is a navigation menu with links for Basic setup, Pilots, Teams, Admins, History, Extras, and a back arrow. The main content area is titled 'Edit competition data' and contains several form fields:

- Tag:** jg2013
- Competition name:** Australian Junior Nationals 2013
- Place:** Narromine, NSW
- Do not show on main page:**
- Start date:** 07-12-2013
- End date:** 14-12-2013
- UTC offset:** 11 (with a note: use negative values for western hemisphere)
- Airfield coordinates:**
 - Latitude:** S 32:12:52
 - Longitude:** E 148:13:29 (with a note: (format: [NSEW] DD dddd, DDMM.mmm or DDMMSS))
- Submit:** A blue button at the bottom.

Adding pilots

You may add pilot information either by manually entering for each pilot, or by importing a SeeYou .cuc competition file.

New pilot

Registration	<input type="text"/>
Password	<input type="text"/> (leave empty for random password)
<input type="submit" value="Submit"/>	

Reporting outlandings

The website is very flexible in ways to report outlandings. If the organisers wish, they can use it by themselves to manage the outlanding office, with no entries being made by pilots. At the other end of the scale, at a large competition, there is the possibility to have pilots, crews, team captains and organisers able to edit the outlanding information relevant to them.

Below is a completed outlanding report. If using all of the user accounts (ie, you have given passwords to pilots and team captains), then this information is accessible to the outlanded pilot, the pilot's team captain, and the organisers. All of these people may edit the outlanding report. Changes can be viewed when looking at the report, along with the time and who made the change.

Outlanding details

Competition ID:	GDH
Date:	26.11.2013
Pilot:	Justin Ramsay
Team:	VIC
Glider:	DG300 (GDH)
Landing time:	20:20
Place:	Warren
Glider status:	OK
Coordinates:	S 31°43'54" E 147°48'15" S 31°43.900' E 147°48.250' S 31.73170 E 147.80420
From airfield:	66 km (NW)
Distance made:	700 km

Google Maps:

Driving directions

Directions on how to reach the pilot can easily be printed, landscape mode is best to get all information. The link to this page can be reached under the google map box in the outlanding report. If you prefer to have the directions on your smartphone, then you can scan the QR codes to receive similar information.

Organiser view of outlandings

This is the first page that the organisers will see when they log into lowcrop.aero. It provides a summary of any outlandings, and will automatically update. The detailed outlanding reports may be accessed by clicking on the competition ID (CID). If the organisers wish to add an outlanding, they may select the 'new report' option at the top of the page.

XQH	Monika Bobula			

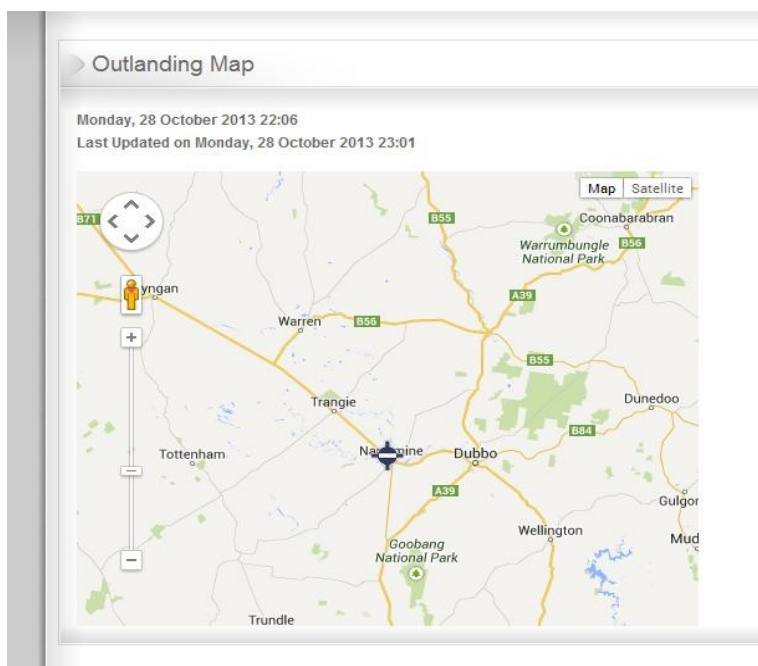

Pilot view of outlanding

When a pilot logs into lowcrop.aero they may only change their password or submit an outlanding report. The default page when a pilot logs in, is the outlanding report page. The pilot name and aircraft are already automatically entered.

Public view of outlanding

If you, as organiser, choose you can have a map or table display of outlandings on your competition website. This is viewable by anyone.

Pilot and team passwords

Password lists can be found under Setup->Extras. A .pdf file will automatically be created with details for all pilots and teams that you have added. When printed, it is easy to cut up the page and put the paper with passwords into each pilot's briefing pack that they receive at registration.

Extras

Choose data to print (via PDF file):

Pilot passwords for printing

Team passwords for printing
